PROFESSIONAL SUMMARY

I am a final-year Bachelor of Computing student specialising in Software Engineering, with an 80.4% weighted average and 30 distinctions from 33 completed subjects. Experienced in full-stack development, real client delivery and leading a team of 25 university tutors. I build practical, user-focused solutions and communicate confidently with technical and non-technical stakeholders.

EDUCATION

Bachelor of Computing (Software Engineering)

Jan 2024 - Dec 2026

Belgium Campus ITversity | **Average: 80.4%** | **30/33 distinctions**

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, Python

Development: Object-Oriented Programming, React, Node.js, Express.js, REST APIs, FastAPI, Bootstrap

Data & Platforms: SQL, PostgreSQL, MongoDB, Firebase, Microsoft Power Platform, Git & GitHub

EXPERIENCE & LEADERSHIP

Head of Tutors

Feb 2026 - Present

Belgium Campus ITversity

- Lead and coordinate a team of 25 tutors, supporting tutor allocation, communication and academic assistance across university modules.
- Promoted after nearly two years of tutoring, developing leadership, mentoring, problem-solving and organisational skills.

Web Designer & Developer

Jan 2026 - Present

Thabani Tech Solutions (Freelance)

- Designed, developed and deployed websites for five clients across education, fitness, e-commerce and professional services.
- Gathered requirements, managed client communication and translated business needs into practical technical solutions.

SELECTED PROJECTS

Dr Vocab - Founder & Full-Stack Developer

2026 - Present

- Designed and launched a children's vocabulary-learning MVP using React and Firebase, reaching over 200 users within 48 hours with no reported stability issues; currently developing the final product using user feedback.
- Live: drvocab.co.za

Smart Farm Capstone - International Team Project

2026

- Collaborated with approximately 25 Belgium Campus and Penn State University students to develop an IoT smart-farming solution, successfully demonstrated to primary-school learners without technical interruptions.

CV Salary Predictor – Machine Learning Application

2026

- Built a React, FastAPI and Python application that extracts information from uploaded CVs and predicts salaries using a Random Forest model, achieving an R^2 score of approximately 0.97.

RSVPly – Full-Stack Event Management Platform

2026

- Developed a React and Firebase platform featuring event creation, shareable RSVP links, attendee management, check-in tracking and event analytics.

BC WildWatch - AI Chatbot Developer

Oct 2025

- Integrated a Google Gemini chatbot into a Microsoft Power Platform safety-reporting application using Power Automate and API integration.
