PROFILE

I am a disciplined and well-organised aspiring software engineer with a strong interest in building practical, user-focused solutions. I work effectively in team-based environments and communicate confidently with both technical and non-technical stakeholders. Through hands-on experience working with clients with little to no IT background, I developed the ability to explain technical concepts clearly without relying on jargon, fostering understanding and trust.

I have leadership experience in education, having been promoted from tutor to Head of Tutors, where I coordinate teams and strengthen my leadership, problem-solving, and organisational skills for collaborative software engineering environments.

EDUCATION

Bachelor of Computing,
Belgium Campus ITversity

January 2024 – December 2026

SKILLS

- | | |
|--------------------------|---|
| • Programming Languages: | C#, JavaScript, Java, Python |

WORK EXPERIENCE

Web Designer & Developer

January 2026 – Present

Thabani Tech Solutions (Freelance)

- Designed, developed, and hosted websites for local businesses, including a gym and three preschools.
- Developed an e-commerce website for a startup and recovered a client's business website, strengthening their online presence and digital operations.
- Managed client communication and translated technical requirements into clear solutions.

AI Chatbot Developer (Team Project)

October 2025

Belgium Campus ITversity – BC WildWatch Animal Safety Reporting App

- Collaborated in a team of 10 to develop a campus animal safety reporting system using Microsoft Power Platform, where I developed and integrated a Google Gemini AI chatbot in Power Apps using Power Automate and API integration.
